Techopoly

Created By: The Techopolist

The main goal of our project is to create a mobile monopoly game. As a kid, many of us have played monopoly, which is a game we all know and love. There have been different iterations of "mobile" monopoly, but they all involve game pieces, physical money, and a separate board. A product that can occupy kids and keep the "mini-van" moms from getting frustrated with their children. Therefore we have created Techopoly. Techopoly is a mobile, Louisiana Tech themed monopoly. It eliminated the need for pieces and paper money by keeping track of each player, their properties, and money values.
